About Orthopaedic Research Group

The Indian Orthopaedic Research Group was formulated in 2007 with a single aim of promoting Orthopaedic Research in India. Over years the organization has grown both in size and activities and has expanded into an International Orthopaedic Research Group. IORG has to its credit more than 100 research projects that are published in various Journals. We run workshops to advance the knowledge of Research Methodology and Journal Publication. We provide various resources like Designing studies, providing statistical assistance and setting up Academic Research Divisions at institutes. For post graduate students we have various sections under making; concise reviews, Ortho-notes, Radiograph Library and information on Conferences and Fellowships. IORG is proud to run the case discussion forum which has more than 4400 orthopaedic surgeons as members and more than 2000 case discussions up till now. We run our own Journals; Journal of Orthopaedic Case Reports and Journal of Orthopaedics and Rehabilitation and latest addition named 'Journal of Orthopaedic Images'. These Journals will provide a platform for Surgeons to Publish and showcase their work. A variety of future plans are being conceived at IORG and with support of Orthopaedic Fraternity, we will work hard to implement them.
Contents

Editorials

The “ODYSSEY”: “Orthopaedic Oncology”
- My journey thus far!
Dr Ajay Puri

Journal of Bone and Soft Tissue Tumors
- A New Beginning
Dr Yogesh Pachwagh, Dr Ashok Shyam
