Cancer Hospital along with Dr. Rahul Chopra (Radiologist) and Dr. Sanjay Wadhwa (Pathologist) from the same Hospital. Dr. Ashish Gulia was the scientific coordinator for

of the programme included introductory talk by eminent speakers. The second half of the programme involved case based interactive sessions covering Cystic Lesions, Chondroid Lesions, GCT, Fibrous Lesions etc. the meeting also had a unique feature of Ortho-radio-patho exhibits in form of posters about most of the

¹Dr. Ashish Gulia MS (Ortho), Mch - Surgical Oncology Fellowship - Musculoskeletal Oncology (TMH - HBNI) Asst. Professor - Orthopaedic Oncology, Tata Memorial Hospital, Mumbai, India.
²Dr Yogesh Panchwagh MS (Ortho) Orthopaedic Oncology Clinic, Pune, India.

attractive prizes for winners. A mix of introductory orthopaedic oncology, pathology

and radiology lectures followed by interactive sessions on various cases saw an audience of

for the positive participation and feedback of the meeting.

B.O.S. Western India Regional Orthopaedic Conference.

24th to 26th December, 2015 (WIROC-2015) J.W. Marriott, Mumbai India. The Bombay Orthopaedic Society (BOS) has its annual conference called Western India Regional Orthopaedic Conference (WIROC). It is one of the biggest Orthopaedic meetings in Western India. This was the Golden Jubilee WIROC, it was called WIROC Grande, celebrating 50 years of academic excellence. The highlight of this conference was in depth discussions on various sub-specialities in Orthopaedics including Orthopedic

seamless discussion and learning points at the end of each case made the session a real worth

Oncology. Orthopedic Oncology was well presented in the conference. The share of orthopedic oncology sub specialty included 4 oral presentations, an hour long oncology session and a symposium on the management of pathological fracture. Even the Dr. R. J. Katrak Oration: The Changing

for the delegates. The important topics, which were included in the session, were management

170 delegates turn up for the event; some from other states as well. Another feature of this meeting was a mix bag of cases clubbed according to age wise presentation; a feature introduced to counter the usual bias in the interactive discussions if cases are clubbed as per their biological aggressiveness or diagnosis, which had been the norm of such meetings till date.

It was a full day meeting, which was accredited by the Maharashtra Medical Council. The office bearers and members of P.O.S. and I.M.S.O.S. undoubtedly should be given credit

Paradigm of Limb Salvage Surgery delivered by Prof. Shekhar Kumta from Hong Kong was centered on orthopedic oncology. One of the 4 podium presentations was accepted in the Prestigious Masalawala Paper session. There was a special session on Orthopaedic Oncology moderated by Dr. Ashish Gulia. It saw an overwhelming audience of 100plus. This was an hour-long session based on discussion related to various case scenarios addressing some volatile issues related to management of benign and malignant bone tumors. orthopedic oncology issues. The session was started by

of ABC, reconstruction after curettage in GCT, newer modalities of management of chondroblastoma and evaluation and management of pathological fracture. The oncology component was well appreciated and was a step ahead in spreading the orthopedic oncology knowledge to general orthopedic surgeons.

Join the OncoMedia Team and keep the interesting news coming through. We invite trainees of all faculties involved in care of bone and soft tissue tumors to become a part of this active and dynamic team. They will be required to search the web and find interesting news and facts (which we will otherwise miss) and send it to the editorial board. A short original write up will be necessary for the same. If accepted your news article will be published with your photograph and affiliation. To be a part of OncoMedia please write an email to us at editor.jbst@gmail.com
